

REASONING FOR CHOOSING THIS

For the relationship between customers and concessions, went back and forth, but chose one customer into many concessions. Thinking on a person on a line in the movie theater buying a popcorn, soda, and jujyfruits (because they are awesome)

Went with one customer into many tickets. Saw one customer into many tickeys. One customer can buy many tickets, but two customers cannot share a ticke

Went with many tickets into one movie. But one ticket doesn't get you into two movies. So many into one.
